

雅思语境阅读词汇手册

阅读练习版

共 12 篇文章 · 覆盖 227 个核心词汇

推荐学习法 (每天约 30 分钟)

1. 第一遍：通读文章，遇到生词先根据上下文猜意思，不要立刻查词典
2. 第二遍：重读文章，标出仍不确定的词，再看下方词汇表
3. 在横线上默写中文释义，然后对照《答案册》
4. 第三遍：重读文章，确认每个目标词在句中的含义
5. 错词抄在本子上，隔天重读同一篇文章复习

说明：雅思 7 分需要约 6000-8000 阅读词汇量，不可能一次背完。本手册精选 12 个话题、220+ 核心词，通过阅读积累。配合文末推荐的免费网站，长期阅读才是正道。

Passage 1 Climate Change and Renewable Energy

话题：环境 Environment | 难度：B2-C1

Climate change is one of the most urgent challenges facing humanity. Scientists have accumulated overwhelming evidence that global temperatures are rising due to greenhouse gas emissions. As a consequence, glaciers are melting, sea levels are increasing, and extreme weather events such as droughts and floods have become more frequent.

Governments worldwide are under pressure to adopt sustainable policies. Many countries have committed to reducing their carbon footprint by investing in renewable energy sources such as solar, wind, and hydroelectric power. Unlike fossil fuels, these alternatives produce little or no pollution and help conserve finite natural resources.

However, the transition is not straightforward. Critics argue that renewable infrastructure requires considerable investment and that economic growth may slow in the short term. Nevertheless, experts maintain that the long-term benefits — including improved public health and greater energy security — far outweigh the initial costs. Individuals can also contribute by recycling, using public transport, and reducing unnecessary consumption.

词汇练习（根据文章语境，在横线上默写中文）

accumulate v. _____
原文 Scientists have accumulated overwhelming evidence.

emission n. _____
原文 Rising due to greenhouse gas emissions.

consequence n. _____
原文 As a consequence, glaciers are melting.

drought n. _____
原文 Extreme weather events such as droughts and floods.

sustainable adj. _____
原文 Governments are under pressure to adopt sustainable policies.

carbon n. _____
原文 Reducing their carbon footprint.

renewable adj. _____
原文 Investing in renewable energy sources.

alternative n. _____
原文 These alternatives produce little pollution.

conserve v. _____
原文 Help conserve finite natural resources.

finite adj. _____
原文 Conserve finite natural resources.

infrastructure n. _____
原文 Renewable infrastructure requires considerable investment.

considerable adj. _____
原文 Requires considerable investment.

maintain v. _____
原文 Experts maintain that the long-term benefits outweigh costs.

outweigh v. _____
原文 Benefits far outweigh the initial costs.

consumption	n.	
原文	Reducing unnecessary consumption.	
urgent	adj.	
原文	One of the most urgent challenges.	
overwhelming	adj.	
原文	Overwhelming evidence that temperatures are rising.	
transition	n.	
原文	However, the transition is not straightforward.	

Passage 2 Artificial Intelligence and the Future of Work

话题：科技 Technology | 难度：B2-C1

Artificial intelligence has transformed numerous industries over the past decade. From healthcare diagnostics to financial analysis, AI systems can process vast amounts of data far more efficiently than humans. This technological revolution has generated both excitement and anxiety about the future of employment.

Automation threatens to eliminate many routine jobs, particularly in manufacturing and administrative sectors. Workers whose skills are easily replicated by machines may struggle to remain competitive in the labour market. On the other hand, innovation typically creates new roles that did not previously exist. Historically, each major technological shift has ultimately produced more jobs than it destroyed.

Education systems must adapt to prepare students for this evolving landscape. Rather than memorising facts, learners need to develop critical thinking, creativity, and the ability to collaborate with digital tools. Governments and corporations should invest in retraining programmes to help the existing workforce acquire relevant qualifications.

词汇练习 (根据文章语境，在横线上默写中文)

artificial	adj.	_____
原文 Artificial intelligence has transformed numerous industries.		
transform	v.	_____
原文 AI has transformed numerous industries.		
numerous	adj.	_____
原文 Transformed numerous industries.		
efficiently	adv.	_____
原文 Process vast amounts of data efficiently.		
revolution	n.	_____
原文 This technological revolution has generated excitement.		
generate	v.	_____
原文 Has generated both excitement and anxiety.		
anxiety	n.	_____
原文 Generated both excitement and anxiety.		
automation	n.	_____
原文 Automation threatens to eliminate routine jobs.		
eliminate	v.	_____
原文 Automation threatens to eliminate many routine jobs.		
replicate	v.	_____
原文 Skills that are easily replicated by machines.		
competitive	adj.	_____
原文 Struggle to remain competitive in the labour market.		
innovation	n.	_____
原文 Innovation typically creates new roles.		
evolve	v.	_____
原文 Prepare students for this evolving landscape.		
critical	adj.	_____
原文 Develop critical thinking and creativity.		
collaborate	v.	_____
原文 The ability to collaborate with digital tools.		

corporation	n.	
原文 Governments and corporations should invest.		
retrain	v.	
原文 Invest in retraining programmes.		
workforce	n.	
原文 Help the existing workforce acquire qualifications.		
qualification	n.	
原文 Acquire relevant qualifications.		

Passage 3 The Changing Face of University Education

话题：教育 Education | 难度：B2-C1

Higher education has undergone significant changes in recent years. Traditional lectures in large auditoriums are increasingly supplemented by online platforms that allow students to access course materials at their own pace. This shift has made education more accessible to people in remote areas and to those who cannot afford full-time study on campus.

Universities are also revising their curricula to emphasise practical skills alongside academic theory. Employers frequently complain that graduates lack the competencies needed in the workplace. In response, many institutions have established partnerships with industry to offer internships and work placements.

Despite these reforms, concerns remain. Some academics worry that the quality of education may decline if universities prioritise vocational training over intellectual development. Others argue that a well-rounded education should cultivate curiosity and the capacity for independent research, regardless of a student's chosen discipline or major.

词汇练习 (根据文章语境，在横线上默写中文)

undergo	v.	
原文	Higher education has undergone significant changes.	
significant	adj.	
原文	Undergone significant changes.	
supplement	v.	
原文	Lectures are supplemented by online platforms.	
accessible	adj.	
原文	Made education more accessible to people.	
remote	adj.	
原文	People in remote areas.	
afford	v.	
原文	Those who cannot afford full-time study.	
curriculum	n.	
原文	Universities are revising their curricula.	
emphasise	v.	
原文	Emphasise practical skills alongside theory.	
competency	n.	
原文	Graduates lack the competencies needed.	
workplace	n.	
原文	Competencies needed in the workplace.	
institution	n.	
原文	Many institutions have established partnerships.	
partnership	n.	
原文	Established partnerships with industry.	
internship	n.	
原文	Offer internships and work placements.	
reform	n.	
原文	Despite these reforms, concerns remain.	
academic	adj.	
原文	Some academics worry about quality.	

prioritise v.
原文 Universities prioritise vocational training.

vocational adj.
原文 Prioritise vocational training over theory.

cultivate v.
原文 Education should cultivate curiosity.

discipline n.
原文 Regardless of a student's chosen discipline.

Passage 4 Urbanisation and Modern City Life

话题：社会 Society | 难度：B2–C1

More than half of the world's population now lives in urban areas, and this proportion is expected to increase further. Urbanisation brings economic opportunities, as cities concentrate jobs, universities, and cultural institutions in a relatively small geographic area. Young people, in particular, migrate from rural regions seeking better career prospects.

However, rapid urban growth also creates serious challenges. Housing shortages drive up property prices, forcing low-income residents into overcrowded accommodation on the outskirts of cities. Traffic congestion and air pollution have become chronic problems in many metropolitan areas. Local authorities struggle to provide adequate public services for expanding populations.

Urban planners advocate for smarter city design that integrates green spaces, efficient public transport, and mixed-use neighbourhoods where residents can live, work, and shop within walking distance. Such approaches could improve quality of life while reducing the environmental impact of urban expansion.

词汇练习 (根据文章语境，在横线上默写中文)

urban	adj.	
原文	More than half live in urban areas.	
urbanisation	n.	
原文	Urbanisation brings economic opportunities.	
proportion	n.	
原文	This proportion is expected to increase.	
concentrate	v.	
原文	Cities concentrate jobs and universities.	
geographic	adj.	
原文	A relatively small geographic area.	
migrate	v.	
原文	Young people migrate from rural regions.	
rural	adj.	
原文	Migrate from rural regions.	
prospect	n.	
原文	Seeking better career prospects.	
shortage	n.	
原文	Housing shortages drive up property prices.	
accommodation	n.	
原文	Overcrowded accommodation on the outskirts.	
outskirts	n.	
原文	On the outskirts of cities.	
congestion	n.	
原文	Traffic congestion and air pollution.	
chronic	adj.	
原文	Have become chronic problems.	
metropolitan	adj.	
原文	Many metropolitan areas.	
authority	n.	
原文	Local authorities struggle to provide services.	

adequate	adj.	
原文 Provide adequate public services.		
advocate	v.	
原文 Urban planners advocate for smarter design.		
integrate	v.	
原文 Design that integrates green spaces.		
neighbourhood	n.	
原文 Mixed-use neighbourhoods.		

Passage 5 Global Health in the 21st Century

话题：健康 Health | 难度：B2-C1

Advances in medical science have dramatically extended average life expectancy in many countries. Vaccines have eradicated or controlled diseases that once caused epidemics, while improved nutrition and sanitation have reduced infant mortality rates. Nevertheless, significant health inequalities persist between and within nations.

Chronic conditions such as obesity, diabetes, and heart disease now account for a growing share of the global disease burden. Sedentary lifestyles and diets high in processed food contribute to these trends. Mental health has also emerged as a major concern, with rising rates of anxiety and depression reported across all age groups.

Healthcare systems face the dual challenge of managing existing illnesses while preparing for future threats. The recent pandemic demonstrated how quickly an infectious disease can spread across borders. International cooperation is essential to monitor outbreaks, share research findings, and ensure that vaccines and treatments are distributed equitably.

词汇练习 (根据文章语境，在横线上默写中文)

advance	n.	_____
原文 Advances in medical science have extended life expectancy.		
dramatically	adv.	_____
原文 Have dramatically extended life expectancy.		
life expectancy	n.	_____
原文 Extended average life expectancy.		
eradicate	v.	_____
原文 Vaccines have eradicated or controlled diseases.		
epidemic	n.	_____
原文 Diseases that once caused epidemics.		
sanitation	n.	_____
原文 Improved nutrition and sanitation.		
mortality	n.	_____
原文 Reduced infant mortality rates.		
inequality	n.	_____
原文 Significant health inequalities persist.		
chronic	adj.	_____
原文 Chronic conditions such as obesity.		
obesity	n.	_____
原文 Chronic conditions such as obesity and diabetes.		
burden	n.	_____
原文 A growing share of the global disease burden.		
sedentary	adj.	_____
原文 Sedentary lifestyles contribute to these trends.		
processed	adj.	_____
原文 Diets high in processed food.		
emerge	v.	_____
原文 Mental health has emerged as a major concern.		
infectious	adj.	_____
原文 An infectious disease can spread across borders.		

cooperation n.
原文 International cooperation is essential.

outbreak n.
原文 Monitor outbreaks and share research.

equitably adv.
原文 Vaccines distributed equitably.

dual adj.
原文 The dual challenge of managing illnesses.

Passage 6 Protecting Cultural Heritage

话题：文化 Culture | 难度：B2-C1

Cultural heritage encompasses monuments, traditions, languages, and artefacts passed down through generations. These treasures connect communities to their ancestors and contribute to a shared sense of identity. UNESCO and other organisations work to preserve sites of outstanding universal value before they are lost to war, neglect, or commercial development.

Tourism can be both a blessing and a threat to heritage sites. Revenue from visitors funds restoration projects, yet excessive foot traffic may cause irreversible damage to fragile structures. Authorities must strike a balance between promoting cultural exchange and implementing regulations that protect historical landmarks.

In an increasingly globalised world, maintaining cultural diversity is particularly important. When minority languages disappear, unique perspectives and bodies of knowledge vanish with them. Educational programmes that teach young people about their local customs and traditions help ensure that heritage remains a living part of society rather than a museum exhibit.

词汇练习 (根据文章语境，在横线上默写中文)

heritage	n.	_____
原文 Cultural heritage encompasses monuments and traditions.		
encompass	v.	_____
原文 Heritage encompasses monuments and traditions.		
artefact	n.	_____
原文 Monuments, traditions, and artefacts.		
ancestor	n.	_____
原文 Connect communities to their ancestors.		
identity	n.	_____
原文 A shared sense of identity.		
preserve	v.	_____
原文 Work to preserve sites of universal value.		
outstanding	adj.	_____
原文 Sites of outstanding universal value.		
neglect	n.	_____
原文 Lost to war, neglect, or development.		
restoration	n.	_____
原文 Revenue funds restoration projects.		
irreversible	adj.	_____
原文 May cause irreversible damage.		
fragile	adj.	_____
原文 Damage to fragile structures.		
strike a balance	phrase	_____
原文 Authorities must strike a balance.		
implement	v.	_____
原文 Implementing regulations that protect landmarks.		
landmark	n.	_____
原文 Protect historical landmarks.		
globalised	adj.	_____
原文 An increasingly globalised world.		

diversity n.
原文 Maintaining cultural diversity is important.

minority n.
原文 When minority languages disappear.

vanish v.
原文 Bodies of knowledge vanish with them.

custom n.
原文 Local customs and traditions.

Passage 7 The Rise of the Gig Economy

话题：工作 Work | 难度：B2-C1

The traditional model of full-time permanent employment is being challenged by the rise of the gig economy. Platforms that connect freelancers with short-term contracts have grown rapidly, offering flexibility that appeals to many workers, especially younger generations who value work-life balance over job security.

From a business perspective, hiring independent contractors reduces overhead costs and allows companies to scale their workforce according to demand. However, gig workers often lack access to benefits such as health insurance, paid leave, and pension schemes. Critics contend that this arrangement exploits vulnerable employees and undermines labour protections built up over decades.

Policymakers are debating how to regulate this sector. Some jurisdictions have introduced legislation requiring platforms to classify certain workers as employees rather than self-employed individuals. The outcome of these disputes will significantly influence the future structure of the global economy.

词汇练习 (根据文章语境，在横线上默写中文)

permanent 原文 Full-time permanent employment.	adj.	
gig economy 原文 The rise of the gig economy.	n.	
freelancer 原文 Platforms that connect freelancers.	n.	
flexibility 原文 Offering flexibility that appeals to workers.	n.	
security 原文 Value work-life balance over job security.	n.	
perspective 原文 From a business perspective.	n.	
contractor 原文 Hiring independent contractors.	n.	
overhead 原文 Reduces overhead costs.	adj.	
scale 原文 Scale their workforce according to demand.	v.	
benefit 原文 Lack access to benefits such as insurance.	n.	
pension 原文 Paid leave and pension schemes.	n.	
contend 原文 Critics contend that this exploits workers.	v.	
exploit 原文 This arrangement exploits vulnerable employees.	v.	
vulnerable 原文 Exploits vulnerable employees.	adj.	
undermine 原文 Undermines labour protections.	v.	
regulate 原文 Policymakers are debating how to regulate.	v.	

jurisdiction	n.	
原文	Some jurisdictions have introduced legislation.	
classify	v.	
原文	Classify certain workers as employees.	
dispute	n.	
原文	The outcome of these disputes.	

Passage 8 Biodiversity Loss and Conservation

话题：环境 Environment | 难度：B2-C1

Earth is experiencing a period of unprecedented biodiversity loss. Scientists estimate that species are disappearing at rates hundreds of times higher than the natural background level. The primary drivers include habitat destruction, climate change, pollution, and the introduction of invasive species into ecosystems that lack natural predators.

Tropical rainforests, which harbour an extraordinary variety of plants and animals, are particularly threatened by deforestation. Farmers clear land for cattle grazing and crop cultivation, often using methods that deplete soil fertility within a few seasons. Conservation organisations campaign for protected areas where wildlife can thrive without human interference.

Protecting biodiversity is not merely an ethical obligation; it has practical implications for human survival. Many medicines are derived from plants and microorganisms found in nature. If ecosystems collapse, the services they provide — including pollination, water purification, and carbon storage — may be impossible to replace.

词汇练习（根据文章语境，在横线上默写中文）

biodiversity	n.	
原文 A period of unprecedented biodiversity loss.		
unprecedented	adj.	
原文 Unprecedented biodiversity loss.		
species	n.	
原文 Species are disappearing at alarming rates.		
habitat	n.	
原文 Habitat destruction is a primary driver.		
invasive	adj.	
原文 Introduction of invasive species.		
ecosystem	n.	
原文 Ecosystems that lack natural predators.		
predator	n.	
原文 Ecosystems lacking natural predators.		
harbour	v.	
原文 Rainforests harbour an extraordinary variety.		
extraordinary	adj.	
原文 An extraordinary variety of plants.		
deforestation	n.	
原文 Particularly threatened by deforestation.		
grazing	n.	
原文 Land cleared for cattle grazing.		
cultivation	n.	
原文 Crop cultivation depletes soil fertility.		
deplete	v.	
原文 Methods that deplete soil fertility.		
fertility	n.	
原文 Deplete soil fertility within seasons.		
thrive	v.	
原文 Wildlife can thrive without interference.		

interference	n.	
原文 Without human interference.		
obligation	n.	
原文 Not merely an ethical obligation.		
derive	v.	
原文 Medicines are derived from plants.		
pollination	n.	
原文 Services including pollination and water purification.		

Passage 9 Social Media and Modern Communication

话题：媒体 Media | 难度：B2–C1

Social media platforms have fundamentally altered how people communicate, consume news, and form opinions. Billions of users worldwide log on daily to share photographs, express views, and maintain connections with friends and family across vast distances. For many, these networks have become an indispensable part of everyday life.

The speed at which information spreads online presents both opportunities and risks. Citizen journalists can report events in real time, yet misinformation and deliberately misleading content can also go viral within minutes. Researchers warn that algorithms designed to maximise engagement may create echo chambers where users encounter only viewpoints that reinforce their existing beliefs.

Educators emphasise the importance of media literacy — the ability to evaluate sources critically, distinguish fact from opinion, and recognise bias. As digital communication continues to evolve, these skills will be essential for participating responsibly in democratic society.

词汇练习（根据文章语境，在横线上默写中文）

fundamentally	adv.	
原文 Have fundamentally altered communication.		
consume	v.	
原文 How people consume news and form opinions.		
indispensable	adj.	
原文 An indispensable part of everyday life.		
maintain	v.	
原文 Maintain connections with friends.		
spread	v.	
原文 The speed at which information spreads.		
misinformation	n.	
原文 Misinformation can go viral within minutes.		
deliberately	adv.	
原文 Deliberately misleading content.		
viral	adj.	
原文 Content can go viral within minutes.		
algorithm	n.	
原文 Algorithms designed to maximise engagement.		
maximise	v.	
原文 Designed to maximise engagement.		
engagement	n.	
原文 Maximise user engagement.		
echo chamber	n.	
原文 Algorithms may create echo chambers.		
encounter	v.	
原文 Users encounter only similar viewpoints.		
reinforce	v.	
原文 Viewpoints that reinforce existing beliefs.		
literacy	n.	
原文 The importance of media literacy.		

evaluate v.
原文 The ability to evaluate sources critically.

distinguish v.
原文 Distinguish fact from opinion.

bias n.
原文 Recognise bias in media content.

democratic adj.
原文 Participating in democratic society.

Passage 10 Sustainable Agriculture and Food Security

话题：农业 Agriculture | 难度：B2–C1

Feeding a growing global population while protecting the environment is one of agriculture's greatest challenges. Conventional farming methods often rely heavily on chemical pesticides and fertilisers, which can contaminate waterways and reduce biodiversity. Meanwhile, intensive irrigation depletes freshwater supplies in regions already prone to drought.

Sustainable agriculture seeks to produce sufficient food without compromising the ability of future generations to meet their own needs. Techniques include crop rotation, organic farming, and precision agriculture that uses technology to apply water and nutrients only where they are required. Small-scale farmers in developing countries may need financial support to adopt these practices.

Food security remains unevenly distributed. While some nations waste enormous quantities of produce, millions of people still suffer from malnutrition. Addressing this imbalance requires coordinated international effort, fairer trade policies, and investment in agricultural infrastructure.

词汇练习 (根据文章语境，在横线上默写中文)

food security	n.	
原文 Sustainable agriculture and food security.		
conventional	adj.	
原文 Conventional farming methods.		
pesticide	n.	
原文 Chemical pesticides and fertilisers.		
fertiliser	n.	
原文 Chemical pesticides and fertilisers.		
contaminate	v.	
原文 Which can contaminate waterways.		
irrigation	n.	
原文 Intensive irrigation depletes freshwater.		
freshwater	n.	
原文 Depletes freshwater supplies.		
prone	adj.	
原文 Regions already prone to drought.		
compromise	v.	
原文 Without compromising future generations' needs.		
sufficient	adj.	
原文 Produce sufficient food.		
rotation	n.	
原文 Techniques include crop rotation.		
organic	adj.	
原文 Organic farming practices.		
precision	n.	
原文 Precision agriculture uses technology.		
nutrient	n.	
原文 Apply water and nutrients where required.		
adopt	v.	
原文 Farmers may need support to adopt practices.		

unevenly adv.
原文 Food security remains unevenly distributed.

malnutrition n.
原文 Millions suffer from malnutrition.

imbalance n.
原文 Addressing this imbalance requires effort.

coordinated adj.
原文 Requires coordinated international effort.

Passage 11 The Psychology of Learning a Language

话题：教育 Education | 难度：B2–C1

Acquiring a second language as an adult presents distinct challenges compared with childhood learning. Research indicates that younger learners benefit from greater neural plasticity, which allows them to internalise pronunciation and grammar more naturally. Adults, by contrast, often rely on explicit rules and translation, which can impede fluency.

Motivation plays a crucial role in determining success. Integrative motivation — the desire to connect with another culture — tends to produce better outcomes than purely instrumental goals such as passing an exam. Learners who immerse themselves in authentic materials, including books, films, and conversations, generally acquire vocabulary more effectively than those who study word lists in isolation.

Errors should be regarded as a natural component of the learning process rather than failures to be avoided. Studies demonstrate that students who are willing to take risks and communicate despite mistakes ultimately achieve higher levels of proficiency. Consistent daily practice, even for brief periods, is far more beneficial than occasional intensive study sessions.

词汇练习 (根据文章语境，在横线上默写中文)

acquire	v.	
原文	Acquiring a second language as an adult.	
distinct	adj.	
原文	Presents distinct challenges.	
neural	adj.	
原文	Greater neural plasticity in younger learners.	
plasticity	n.	
原文	Greater neural plasticity.	
internalise	v.	
原文	Internalise pronunciation and grammar.	
explicit	adj.	
原文	Rely on explicit rules and translation.	
impede	v.	
原文	Which can impede fluency.	
fluency	n.	
原文	Rules and translation can impede fluency.	
crucial	adj.	
原文	Motivation plays a crucial role.	
integrative	adj.	
原文	Integrative motivation produces better outcomes.	
instrumental	adj.	
原文	Purely instrumental goals such as exams.	
immerse	v.	
原文	Learners who immerse themselves in materials.	
authentic	adj.	
原文	Immerse in authentic materials.	
isolation	n.	
原文	Word lists studied in isolation.	
component	n.	
原文	A natural component of learning.	

proficiency n.

原文 Achieve higher levels of proficiency.

consistent adj.

原文 Consistent daily practice is beneficial.

beneficial adj.

原文 Far more beneficial than intensive sessions.

intensive adj.

原文 Occasional intensive study sessions.

Passage 12 Government Policy and Public Welfare

话题：政府 Government | 难度：B2-C1

Governments face constant pressure to balance economic growth with social welfare. Tax revenue funds essential services including education, healthcare, and infrastructure, yet excessive taxation may discourage investment and drive businesses abroad. Finding an optimal policy mix requires careful analysis of evidence rather than reliance on ideology alone.

Welfare programmes aim to alleviate poverty and reduce inequality by providing financial assistance to disadvantaged groups. Supporters argue that a robust safety net promotes social stability and enables citizens to pursue education and employment opportunities. Opponents contend that overly generous benefits may create dependency and reduce incentives to work.

Transparency and accountability are vital for maintaining public trust. Citizens expect officials to implement regulations fairly, enforce the law consistently, and consult communities before making decisions that affect their daily lives. When governments fail to meet these standards, voter dissatisfaction can lead to political unrest.

词汇练习 (根据文章语境，在横线上默写中文)

welfare	n.	
原文	Balance economic growth with social welfare.	
revenue	n.	
原文	Tax revenue funds essential services.	
infrastructure	n.	
原文	Funds education, healthcare, and infrastructure.	
taxation	n.	
原文	Excessive taxation may discourage investment.	
discourage	v.	
原文	Taxation may discourage investment.	
optimal	adj.	
原文	Finding an optimal policy mix.	
ideology	n.	
原文	Rather than reliance on ideology alone.	
alleviate	v.	
原文	Alleviate poverty and reduce inequality.	
disadvantaged	adj.	
原文	Assistance to disadvantaged groups.	
robust	adj.	
原文	A robust safety net promotes stability.	
stability	n.	
原文	Promotes social stability.	
opponent	n.	
原文	Opponents contend that benefits create dependency.	
generous	adj.	
原文	Overly generous benefits.	
dependency	n.	
原文	May create dependency and reduce incentives.	
incentive	n.	
原文	Reduce incentives to work.	

transparency	n.	
原文	Transparency and accountability are vital.	
accountability	n.	
原文	Transparency and accountability.	
consult	v.	
原文	Consult communities before making decisions.	
unrest	n.	
原文	Dissatisfaction can lead to political unrest.
